LED Tower Lights are designed for visual signaling in order to display the status of a variety of processes. After the easy installation of our assemblies, they give you an instant notification system for employees.

These assemblies use LED technology for long life span. Continuous light operation upon flip of switch.

Note for longer pole lengths: Mfg. recommends purchasing standard 3.5" pole light and components for customer to assemble using receptacle box, conduit and steel switch housing. Manufacturer does not supply conduit or steel switch housing.
